

Clevis Pins

PRECISION MADE IN THE
U.S.A.

Clevis Pins

Pivot Point manufactures clevis pins in-house. Stock pins are cold headed per IFI standards except for hole and point dimensions. All holes are chamfered for a superior part finish.

Only the finest cold heading quality wire is used. Standard clevis pins are manufactured in low carbon steel or stainless type 302, and stocked plain finish. Holes are drilled per Pivot Point specifications.

Special clevis pins and grades are available. Pivot Point stocks alloy material to produce up to grade 8 strength if required. Secondary heat treatment, plating, grooving and end chamfering available.

Alternate Head Styles

FLAT HEAD

PAN HEAD

TRUSS HEAD

BUTTON HEAD

Standard Hole Location

Any hole is placed on center from end of pin, a distance equal to its diameter
Example:
